Projects

Deal-IO Game Finder, <https://aroonsalotra.github.io/game-deals/> 

Steam game & sale finder using Cheapshark API

Features a search component to filter through API games & sections sorting games by rating & price.

Workout App, <https://aroonsalotra.github.io/workout-app/> 

Application for fitness newbies

Using a selection of free workout programs, I created a program to help beginners choose and understand popular fitness routines.

Covid App, <https://aroonsalotra.github.io/covid-app/> 

Covid stat tracker using APIs

App to showcase Covid deaths and case statistics. Includes an option to sort by Alphabetical, Highest and Lowest cases.

Clicker Game, <https://aroonsalotra.github.io/clicker-game/> 

Click to defeat enemies which scale based on character level, each kill awards XP and gold - can be spent in shop.
