## SKILLS

---

- |              |         |       |         |
|--------------|---------|-------|---------|
| • Javascript | • HTML  | • CSS | • React |
| • Bootstrap  | • Redux | • Git | • Figma |

## PROFILE

---

Coming from a Game Development background and the design principles that I had learned, I was quickly able to learn the concepts of programming and build my skillset by undertaking projects that would use different methods & ways of thinking to solve problems

## PROJECTS

---

### PC Game Deal Finder

<https://aroonsalotra.github.io/game-deals/>

Steam game & sale finder using Cheapshark API

- Features a search component to filter through API games & sections sorting games by rating & price

**React | APIs**

### Workout App

<https://aroonsalotra.github.io/workout-app/>

Application for fitness newbies

- using a selection of free workout programs, I created a program to help beginners choose and understand popular fitness routines.

**React**

### Covid App

<https://aroonsalotra.github.io/covid-app/>

Covid stat tracker using APIs

- for my first time using APIs, I created an app to showcase Covid deaths and case statistics. Includes an option to sort by Alphabetical, Highest and Lowest cases

**React | APIs**

### Clicker Game

<https://aroonsalotra.github.io/clicker-game/>

Interactive clicker game that scales up the more you play.

- Click to defeat enemies which scale based on character level, each kill awards XP and gold - can be spent in shop

**React**
